DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 4, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Hermansson (WO02/061522).

Hermansson discloses a locking device comprising: an adjustable holder (15) provided with a recess; a stationary contour (16) with a contact surface; a pin (23) arranged movably in said recess; a compression spring (31) generating an axial spring force applied to said pin, said pin having a pin head, which projects from said recess of said holder and has a contact pair with said contact surface (see Fig 3); and a centering device (18) between said pin and said holder, said centering device has having at least one elastically deformable ring (page 5 lines 4-23), which is arranged between said pin and said holder within said recess (see Fig 3), said elastically deformable ring being arranged displaceably within said recess, and said elastically deformable ring has a surface (36) with a cross section tapering against the direction of the force of said compression spring (taper is the same direction as applicant's invention, see Fig 3), said surface (36) of said elastically deformable ring is in contact with a complementary surface at said pin (see Fig 3).

Re claim 3, said elastically deformable ring has at least one said slot (25), which is arranged axially to a longitudinal axis of said pin and/or said recess and partially severs said ring (see Fig 4).

Re claim 4, said tapering surface of said elastically deformable ring has a conical shape (38).

Re claim 21, wherein said contact surface has at least one depression (see Fig 2).

Allowable Subject Matter

3. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 17-20, 22, and 23 are allowed.

Response to Arguments

Some further comments regarding the applicant's remarks are deemed appropriate.

The applicant argues that the Hermansson reference fails to meet the limitations of the claims because the elastically deformable ring as described on page 5 lines 4-23 is only elastic radially. It is disagreed. The ring is elastically deformable and therefore meets the limitations of the claims.

Applicant's remarks have been accorded due consideration, however, they are not deemed fully persuasive.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
